

Plot 29 | R544 Road | Naauwpoort | Emalahleni (Witbank)

P.O. Box 14248 | Leraatsfontein | 1038

Company Profile

We are in business for over 30 years. This company was established in 1985.

We deal in used mining and industrial equipment, scrap metal, usable structural steel and plate, conveyor, and all other related materials. We also do site demolishing and offer a bin service for scrap material.

Our premises are situated on Plot 29, Naauwpoort, just off the R544, in the Witbank/ Emalahleni region. It is in close proximity of the Mines, Power stations and local Industries. This is also where we source our material and stock from.

Our operation entails the identification, sorting and processing of equipment and scrap. The scrap is in turn consumed by the local steel mills and foundries after we have processed it according to the I.S.R.I standards.

We are members of the MRA (Metal Recycling Association) who enforce strict code of conduct to all its members.

Equipment and plant is marketed to the relevant industries and customers. Useable steel and material is sold to the local industries and public.

We operate a substantial fleet of vehicles and equipment. This includes bin trucks, grab trucks, cranes, LDV's, front end loaders, scrap handling equipment, dozers and excavators.

We employ an average of 50 staff members, and also make use of contractors. We follow a strict safety policy and develop most of the staff's skills in house.

We strive to service our sector of industry with excellence.
